Turn your dreams into reality in 2010

Have you ever watched F1, Le Mans or Touring Cars on television and wondered what it would be like to find yourself in the driving seat? Well Westfield Sportscars have found a brilliant way to make this happen.

The Westfield Race Academy is a uniquely packaged scheme aimed exclusively at drivers new to motorsport. We've specially created the race-chassied, road-legal, 150bhp, AeroRace 150Z and married this to an essential range of training, support and race day services, all designed to take you from the armchair to the Grid!

With additional safety features built-in as standard and the ability to upgrade to either the Clubsport Class or the amazing 190 Series, the AeroRace 150Z is everything you need from a race car – and of course, unlike most racers, you can even drive it to and from the track!

AeroRace 150Z

Stiffened AeroRace Chassis • 2 Litre Ford Zetec engine (150bhp) • Available in 10 body colours • Full Safety Kit including Roll Cage • Supplied in kit form (Factory or Race Team build option available) • 13" Race Wheels • Use for Road, Race or Track
